DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Squires et al (herein Squires), USPN 4,979,055.

3. Referring to claims 1 and 13, Squires teaches:

a microprocessor executing application programs (figure 1, element 24);

a data disc (figure 1, element 12);

an actuator assembly rotatably mounted adjacent the data disc for positioning transducer heads relative to the data disc (figure 1, element 16);

a servo control module controlling the actuator assembly (figure 1, element 34);

a memory containing the operating system and operably connected to the microprocessor, whereby the microprocessor runs the operating system (figure 1, element 26 stores the software architecture of a control program and other processes); and

a communication means operable connected to the microprocessor and the memory for communicating data stored on the data storage device to a node on a communications bus (figure 1, element 28).

4. Referring to claims 2 and 14, Squires teaches an input/output module operable to receive data from a node on the communication network (figure 1, element 28).

Art Unit: 2182

5. Referring to claim 5, Squires teaches the data storage device is a three and one half inch form factor assembly (figure 1 shows a standard hard drive).

Allowable Subject Matter

6. Claims 3, 4, 6, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 16 and 17 are allowed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
